Digital Transformation At Play In Retail

Enriching Consumer Experiences

Improving Operational Efficiencies

Digital Transformation in Retail Industry

Your enterprise touches consumers lives on a daily basis. While their expectations are growing at a rapid pace, the industry is undergoing a metamorphosis thanks to the new age digital technologies. This oft quoted digital transformation is happening on both the planks of consumer experience and operational efficiencies.

Technology disruptions on the consumer experience front are rapidly changing the way a consumer shops. Some of the trends on this front are improving in store experience using context aware personalization, augmented and virtual reality solutions, in store analytics to improve consumer experience with timely assistance and information and also at the comfort of their arm

chair they can talk to “Digital Assistants” and place an order.

To support this rapid change the enterprise is undergoing a lot of change internally in terms to improve the operational efficiencies to deliver a greater experience. This change is being enabled by many IoT enabled solutions which help track asset utilizations, performance; energy consumption patterns and shelf management. Enterprises are then analyzing this data and empowering their employees to actionize appropriately.

We at Bosch pride ourselves in providing solutions to the challenges of this fast changing digital world. Come on board and experience the Bosch solutions to help you embrace these exciting times.

IERO

Enable | Engage | Enrich

Brief

Helps deliver unique experience to every consumer at your retail store. It combines the capabilities of indoor positioning, behavioral analytics, AR, AI to provide improved consumer experience at a physical location
